

## DIAGNOSTIC TEST FOR QUICK IDENTIFICATION OF PNEUMOCYSTIS IN CLINICAL SAMPLES

### Areas of Application

The test is designed for quick specific diagnostics of pneumocystis pneumonia, at different stages, in patients with high PCP risks (HIV patients and those who administer immunosuppressive therapy). The test can be used at all hospitals equipped with a standard PCR diagnostic laboratory

### Advantages

There are no analogs in Ukraine. The test enables quick, high-sensitive, and specific diagnostics of pneumocystis

### Specification

The test sample comprises a master-mix, positive and negative controls, and guidelines for carrying out PCR and interpreting the results

### Stage of Development.

### Suggestion for Commercialization

IRL5, TRL5

Trial samples production clinical tests, upon request

### IPR Protection

IPR1, IPR2
