IPR2, IPR3

Areas of Application

The cultivars can be used for ornamental horticulture and landscape gardening (autumn flowering gardens) and floristry

Specification

The varieties have been bred by analytical selection. The plants are of compact, spherical, columnar shape, from 15 to 130 cm high; the flowering period: early, middle, and late autumn. The inflorescences are yellow, pink, terracotta, red, or purple colored; full, radiant, anemone-like shaped. The ray floret edges have a sharp, round, toothed or spurred shape. The *Vechirnia Simfonia*, *Zagadka Oseni*, *Charivniy Son*, *Yablunevyi Tsvit*, *Kyivska Krasunia*, *Videnskyi Bal*, *Bilochka*, *Pisnia Polonyny*, and *Roksel* varieties have been recorded in the State Register of Plant Varieties Suitable for Growing in Ukraine

Advantages

The varieties are diversified in terms of flowering time, plant height, and inflorescence color. The plants start flowering before frosts and are notable for a high productivity and an abundant blossom. The varieties are winter-hardy and resistant to diseases and pests
