

The International workshop

MONITORING SCIENTIFIC, TECHNICAL AND INNOVATIVE DEVELOPMENT OF UKRAINE”

Innovation plays a pivotal role in the modern economy and in the daily lives of citizens across the globe. The future of the European Union is inextricably linked to the advancement of innovation, as explicitly outlined in the A New European Innovation Agenda, which was formally approved in July 2022.

To ensure the formation of an effective national policy in the field of science and innovation and its further implementation, relevant information is needed on various aspects of the development of science and innovation, and to determine the relationship with economic growth.

Therefore, the relevance of monitoring and evaluation of scientific, technical and innovative development is increasing, and this activity requires the introduction of new approaches for timely response to new phenomena and trends.

The main issues planned for discussion at the workshop:

- *Problems of statistical measurement of scientific, technical and innovative activity in Ukraine and the world;*
- *Monitoring of scientific and technical activities of the business sector: how to obtain reliable data;*
- *Challenges of monitoring scientific and innovative development during the war and post-war period and ways to solve them;*
- *Development of an effective monitoring system of scientific, technical and innovative development of Ukraine*

The seminar will take place on **May 30, 2024, at 10:00 a.m.**

Format: hybrid (offline and online on the Zoom platform).

Venue: information will be sent to registered participants.
