RE: Congratulations on the Centennial Anniversary of the NAS of Ukraine

Dear President Borys Paton:

It is my great pleasure to extend my sincere congratulations on the centennial anniversary of the National Academy of Sciences of Ukraine. I would like to express my deepest respect to the dedication and commitment that the NAS of Ukraine has demonstrated for contributing to national development and benefiting humanity over the past century.

Although I am unable to join the centennial ceremony next month in Kiev, I firmly believe that your unsurpassable leadership and your academy's unparalleled research legacy in the pursuit of excellence will help the NAS and Ukraine continue to flourish. I also look forward to establishing a partnership between KAIST and the NAS for future collaboration in many fields of science and technology in the years ahead.

May you continue to provide excellence in research of sciences for another century.

All the best wishes,

Sung-Chul Shin, Ph.D.

President of KAIST
