Supporting Letter for Academician National Academy of Sciences of Ukraine Prof. Dr. Zagorodny A.G.

I have known Prof. Anatoly Zagorodny since the 1980s, when the Statistical Physics centers in Rostock and in Berlin collaborated with the centers of Statistical Physics in Kiev and in Lviv. We have met at many conferences in the Ukraine, in Russia and in many other countries. I consider him as one of the leading members of the schools working in the tradition of the late Academician Nikolai N. Bogolyubov.

Prof. Anatoly Zagorodny is now a leading expert in most topics of statistical physics, covering the most important issues of modern statistical theory, including the method of distribution functions, applications to plasmas, Bose condensation and radiation issues. His papers and monographs are well known in the world. Many of his research provided pioneering contributions to most of the fields of activities of Academician Nikolai N. Bogolyubov.

Prof. A. Zagorodny many years works as Director of the Bogolyubov Institute for Theoretical Physics, continuing the best traditions of this extraordinary institute, which I had the pleasure to visit many times since the 1970th and which I consider as a leading center of statistical physics in the world. I also know that combining the post of Director of the Bogolyubov Institute with the post of Vice-president of the National Academy of Sciences of Ukraine Professor A. Zagorodny made a significant contribution to the development of international cooperation of the Academy with research centers in many countries, including Germany.

In view of the forthcoming presidential elections in the National Academy of Sciences of Ukraine, I would like to support the candidacy of Academician A. Zagorodny for this position. In my opinion, he meets all the requirements for the successor of the outstanding President of the National Academy of Sciences of Ukraine B.E. Paton. At the present moment I do not know any other scientist who has better conditions with respect to abilities and the power to fulfil the enormous duties of this eminent post.

Werner Ebeling,
30 September 2020
